

PRISTINECLEAN

WEB STYLE GUIDE

Impeccable. Every time.

Premium B2B cleaning for corporate offices, luxury retail, law firms and boutique hospitality.

01 — Brand foundation

PristineClean should feel immaculate, discreet and highly dependable. The visual language is deliberately closer to a premium professional-services brand than a domestic cleaning company.

IMMACULATE Precise, spotless, controlled.	TRUSTWORTHY Calm, consistent, dependable.	BOUTIQUE Refined, considered, premium.
PROFESSIONAL B2B, structured, confident.	DISCREET Never loud or gimmicky.	CLINICAL Clean, exact, contemporary.

Design principle

Luxury comes from restraint: generous whitespace, strong typography, one accent colour and photography that communicates standards rather than domestic chores.

02 — Colour system

The palette is built around deep navy/charcoal, pure white and a controlled emerald accent. Emerald should be used sparingly to signal quality, action and the sparkle motif.

Pristine Navy
#0B172B

Charcoal
#172033

Emerald
#00A88F

Deep Emerald
#007D70

Pure White
#FFFFFF

Soft White
#F7F9F8

Mist
#E8EEEC

Slate
#687486

Usage ratio

Recommended starting point: 65% white / soft white, 25% navy or charcoal, 10% emerald and supporting neutrals. Avoid turning the site green.

03 — Typography

Use a modern geometric or humanist sans-serif. The logo remains the primary brand expression; web typography should be clean, highly legible and spacious.

HERO / DISPLAY	Pristine spaces deserve pristine standards.
H2	Exceptional standards, every visit.
BODY	Professional cleaning designed around your business, your people and your standards. Quietly delivered, consistently maintained.
BUTTON	REQUEST A QUOTE

Suggested web font pairings

Primary: Inter / Helvetica Neue / Avenir Next style. Alternative premium: Manrope or Neue Haas Grotesk style. Use 400 for body, 500–600 for navigation and buttons, 600–700 for headings.

04 — UI & components

PRISTINECLEAN	SERVICES	SECTORS	ABOUT	CONTACT	REQUEST A QUOTE
---------------	----------	---------	-------	---------	-----------------

Corporate offices Discreet, reliable cleaning that protects the impression your workplace makes.	Luxury retail Presentation-ready spaces with meticulous attention to every visible detail.	Professional services High standards for law firms, finance and client-facing environments.

05 — Photography & imagery

Photography should show immaculate environments, architectural detail and professional standards. Avoid stock imagery of domestic cleaners, spray bottles, mops, buckets or cartoon cleaning icons.

Image direction: bright architectural photography, clean lines, glass, stone, brushed metal, premium offices, boutique hotel corridors and luxury retail interiors. Use natural light and restrained contrast. Where people appear, show polished professional teams rather than domestic cleaning scenes.

06 — Layout, spacing & accessibility

The site should breathe. Large whitespace communicates confidence and premium positioning.

8	16	24	40	64
8 px	16 px	24 px	40 px	64 px

Accessibility checklist

- Maintain strong contrast for body text and buttons.
- Never use emerald text on white for long paragraphs.
- Keep body copy around 16–18 px on desktop and 16 px minimum on mobile.
- Use clear focus states and keyboard-accessible navigation.
- Buttons should be descriptive: “Request a quote” rather than “Click here”.

Responsive behaviour

Desktop: generous 1200–1320 px content width. Tablet: reduce section padding. Mobile: stack cards, simplify navigation and preserve the logo's visual breathing room. The sparkle icon can become the favicon/app mark.

07 — Homepage visual recipe

A recommended premium landing-page structure.

Below the fold

01. Trust indicators → 02. Services → 03. Sectors → 04. Standards / process → 05. Testimonials → 06. Quote CTA → 07. Footer.

Tone of voice

Short, assured and factual. Say “meticulous cleaning for client-facing environments”, not “we make your office sparkle”. Avoid exaggerated claims unless independently substantiated.

08 — Logo & asset rules

The supplied logo establishes the visual direction: a premium navy wordmark, distinctive sparkle motif, and restrained emerald accent. Keep the mark simple and consistent across every touchpoint.

ASSET	RECOMMENDATION
Primary logo	Navy wordmark + emerald sparkle on white / soft white
Reverse logo	White wordmark + emerald sparkle on Pristine Navy
Favicon	Emerald sparkle alone, preferably on navy
Header	Horizontal wordmark; tagline optional depending on viewport
Van livery	Large wordmark; minimal copy; high contrast
Business card	White/soft-white front; navy reverse with emerald accent
Social profile	Sparkle mark or compact PristineClean lockup

Final design rule

If an element makes PristineClean look like a generic domestic cleaning company, remove it. The brand should always feel like a premium facilities partner: precise, calm, discreet and dependable.
